

添加删除table行，并进行刷新

添加行的js如下 table 的id为myTable

添加table的一行内容

```
function insertRow() {
    var rowValue = document.getElementById("zdhRowCount").value;
    // alert(rowValue);
    if (rowValue == "")
        rowValue = "0";
    var rowCount = parseInt(rowValue) + 1;
    var c0 = "<tr><td><input type=\"checkbox\" /></td>";
    var c1 = "<td class=\"bg02\" > <select id=\"Txt_ND\" + rowCount + \"\"> " + optionYear + "
</select></td>";
    var c2 = "<td> <input type=\"text\" id=\"Txt_FWXMMC\" + rowCount + \"\" name=\"l\"
style=\"width:100px;\" /> </td>";
    var c3 = "<td> <input type=\"text\" id=\"Txt_FWDD\" + rowCount + \"\" name=\"l\"
style=\"width:100px;\" /></td>";
    var c4 = " <td><input type=\"text\" id=\"Txt_FWNR\" + rowCount + \"\" name=\"l\"
style=\"width:100px;\" /> </td>";
    var c5 = "<td> <a id=\"0\" href=\"JavaScript:void(0);\" onclick=\"DeleteSingle(this)\">
<span> 删除</span></a> </td> </tr>";
    var row = c0 + c1 + c2 + c3 + c4 + c5;
    $("#myTable").append(row);
    document.getElementById("zdhRowCount").value = rowCount;
}
```

遍历表，获取表的信息

涉及到读取行，获取下拉列表，输入框的值

```
function AddServiceHistory() {
    var table = document.getElementById("myTable");
    var content = "";
    var hyid = document.getElementById("hdfd_yhid").value;
    for (var i = 1; i < table.rows.length; i++) {
        var row;
        var rtl = table.rows[i].cells[1].getElementsByTagName("select")[0];
        // alert(rtl.options[rtl.selectedIndex].value);
        content += hyid + "$";
        content += rtl.options[rtl.selectedIndex].value + "$";
        //content += table.rows[i].cells[1].getElementsByTagName("select")[0].value + "$";
        content += table.rows[i].cells[2].getElementsByTagName("input")[0].value + "$";
        content += table.rows[i].cells[3].getElementsByTagName("input")[0].value + "$";
        content += table.rows[i].cells[4].getElementsByTagName("input")[0].value + "$";
        // content += table.rows[i].cells[2].getElementsByTagName("input")[0].value + "$";
        content += "~";
    }
    content = escape(content);
}
```

```

        AddServiceHistorys(content);
    }
}

```

这是传递参数到指定页面，取值后直接进行结果的显示

```

function AddServiceHistorys(obj) {
    // 构建表格创建以往服务时间
    // ajax获取table
    alert(obj);
    $.get("/XZYZY/ZYZ/GetServiceHistory.aspx", { pval: obj, TextType: "add" }, function (data) {
        // alert(data);
        if (data != null) {
            if (data == "false") {
                // document.getElementById("div_history").style = "none";
                if (null != document.getElementById("div_history")) {
                    alert("操作失败!");
                    document.getElementById("div_history").style.display = "block";
                    document.getElementById("services").innerHTML = data.split("false")[1];
                }
            } else {
                // alert(data);
                if (null != document.getElementById("div_history")) {
                    //alert("操作成功");
                    document.getElementById("div_history").style.display = "block";
                    document.getElementById("services").innerHTML = data.split("true")[1];
                }
            }
        }
    });
}

```

此方法为删除选中行

// 删除行

```

function DeleteRow() {
    var table = document.getElementById("myTable");
    if (table.rows.length < 2) {
        return;
    }
    var rows;
    var cells;
    var checkeds;
    var dd = table.rows.length - 1;
    for (var i = dd; i > 1; i--) {
        rows = table.rows[i];
        cells = rows.cells[0];
    }
}

```

```
checkeds = cells.getElementsByTagName("input")[0];
if (checkeds.checked == true) {
    table.deleteRow(rows.rowIndex);
}
}
}
```

志愿者以往服务经历+

添加经历

删除所选经历

	年度	服务项目	服务地点	服务内容	删除
<input type="checkbox"/>	2015	34123	啊打发	阿士大夫	删除
<input type="checkbox"/>	2015	12	撒地方	阿德发的	删除
