

清除浮动

1. 为父元素设置 `overflow: hidden/auto;`

```
.clearfix{  
    border: 1px solid #333333;  
    margin:0 0 100px 0;  
    overflow: hidden;  
}
```

2. 给父元素添加伪类 `:after{ clear: both; }`

```
.clearfix:after{  
    content: ".";  
    display: block;  
    height: 0;  
    visibility: hidden;  
    clear: both;  
}
```

3. 同时浮动父元素

```
.clearfix{  
    border: 1px solid #333333;  
    margin:0 0 10px 0;  
    float:left;  
    width: 100%;  
}
```
